T. S. FOURACRE. TANCE PHONE NO. 37.

MIDDLETOWN, DEL., JAN. 11, 1908.

MONEY TO FIGHT DISEASE "As it looks now the Del aware Anti-Tuberculosis Society is to be the gainer by five thous and dollars as the outcome of the sale of Christmas and New Year stamps in this city and in Philadelphia. The scheme was suggested and put into operation only a short time before Christmas, but the ready response of the public assisted by some friendly ones in Philadelphia, made the project decidedly more successful than was ever im

With five thousand dollars available the work of the Delaware society is to continue with an extension of efforts. There is a genuine sentiment aroused respecting the prevention of tuberculosis and the care of those in the early stages of the disease The exhibit which opened in this city yesterday is to further stim ulate individual effort, and the enthusiasm aroused is to secure more definite and positive work.

"The efforts of the Delaware society are to be increased and it is especially gratifying to know that the general public, through the contribution of a few cents for the individual, is playing a direct part.

"There is always a feeling that the "public" means those in official control of affairs. As a fact the "public" is made up of all the people, and through the application of the stamp scheme the real "public" has come forward generously. There is no reason why the same method of securing revenue should not be encouraged and kept up during the year in some form."-Morn-

INDUSTRIAL MURDER MUST STOP

"The waste of human life by false industrial economy must life of a foreigner employed in the cease. The system that preand least considered raw material used in wealth production. Civilization is going to force a change in the standard of values that will stop the profit in scrap heaping humanity instead of ma

"The adverse decision of the United States Supreme Court kills the common carriers employes liability act of June, 1906. But we regard that ruling as merely a halt in a progress that injured in one year's time? is inevitable; a hint to Congress that approval awaits an amend d maimed into helplessness each statute identical in all essential year are producers, contributors features, but narrowed to meet to the nation's wealth; the great constitutional limitations; a monition to the Legislatures of all productiveness the hurt are the states to follow Pennsyl shifted to dependence; the killed vania's lead and pass local laws leave those whom they had supto complete and perfect a general ported charges upon the public. easure of protection for the working men of the nation.

"We do not deem it necessary to assail the action of the court which has annulled what unques tionably was the expressed will live power, Mr. Reeve put the of the American people.

"We would not go so far as at \$50,000,000. President Roosevelt has in some comments upon judicial usurpa tion; not even so far as Presi- tion anything but accidents. It dent Lincoln, who declared in does not include the tuberculosishis first inaugural that when breeding sweatshops, the unsanwe recognize the sole power of itary factories, the places where the court to define the limits of workers are poisoned by lead or constitutional, executive or legis the fumes of chemicals or the flylative action, the people will have ing particles from filings. ceased to be their own masters, having to that extent resigned den falls upon the community, their government into the hands'

of the Supreme Court. We counted it a significant indication of modern American appliances and sanitary improve thought when a man of the standing of Dean Trickett, of the Dick inson School of Law, wrote some months ago in the North Ameri can Review as follows:

'There is no rule as to the proporti against a decree of nullity of a statut Acts of Congress have very seldom be-pronounced void by a unanimous court In a majority of cases there have been three or even four dissenters. Often the vote of the court has been cast practic. I by one judge. Did the makers of the constitution contemplate this? If they had, would they have ordained that that the support of helpless widows and orphans must not possibly of a practically quantimous people whom Congress represents? Propriety and respect for the judgment of a co-ordinate branch of sine government imperatively require that the small court which condemnate legislation of a numerous Congress, supported by a namerous contributory negligence and the practice of invoking the law's delays so that a claim for personal set aside the judgment of the minority

seem a prophetic comment upon lays so that a claim for personal

President Roosevelt's theory that yer as Senator Knox had pre- the entire 'risk of a trade' pared and introduced a bill, should be placed on the employer. slightly narrowed in its provisions, yet in his belief meeting erly adding it as a legitimate cost every objection raised by the of production, and hence assesing Supreme Court.

"Now in our estimation there rises an opportunity for organized labor throughout the country more fruitful of good results than any wage or hour demands. The unions should lead in a move ment in which all thoughtful and right-minded Americans will sympathize and follow. The demand for life-saving legislation should be enforced upon Congress first and afterward upon every Legislature sitting in a state capitol.

"The annual mortality lists of every European nation shame this country. The truth cannot be told too often that by com parison we are a nation of industrial murderers.

"Of the 29,000,000 workers in this country, one is killed or injured every minute of every working day. In a notable article in Everybody's Magazine recently Arthur Reeve computed that in every year more than half a million men, women and children are killed or crippled as a direct result of the occupations in which they are engaged.

Hazards of daily work that could be prevented kill ten persons every day in New York city and six in Chicago. But it is with regret that we note that the bad eminence of leadership in waste of life is held by Allegheny county, in this state, with 17,000 industrial deaths and serious inthese, the coroner of that county has said:

" 'Conditions are such that the mills is given less consideration vails makes men the cheapest than is the life of a horse or mule." And the Hungarian con sul protests: "If even the present laws were enforced, conditions would not be so bad.

"What is the cost in money of this system that the incomplete and therefore underestimated totals of the census showed responsible for the slaughter of 57,500 persons in 1900? Who pays the bill when 69,191 railroad men and 5986 miners are killed and

"The half million killed and majorit skilled toilers. From

"The industrial insurance com panies put the conservative estimate of \$400 upon the net economic gain of the average worker. Based on this producannual loss in dollars and cents

"But this is inadequate. For it does not take into considera-

"Yet in all these cases the bur and in most instances by the employer's violation of law or his sordid refusal to install safety

"Preaching and teaching to corporations are slow methods of progress. The only thing to do is to make man killing bad busi ness; to make industrial murder unprofitable.

"The employers, corporate and otherwise, must be, taught as in England by the liability law, that they have no right to risk killing men for the sake of saving money; that it is for them to pay when a family is deprived of the -arning power of the father;

will profit in the end. They will For

ch the courts are all part and parcel of a barbaric, out-

grown, profitless system. "Let them be taught that they ity decision, as in any way affect- must pay for the lives and the ing the justice, the need or the limbs lost by unsafe and obsolete constitutionality of installing the machinery. It will not take them doctrine of the employer's liabil- long to learn that the extra care ity as a fixed part of our national and the cost of safety appliances will exact from them far less than "We need no better proof of it now takes to contest damage ur contention than the fact that suits and ultimately pay out to

"They will learn the truth of who will then pass it along, propit upon the consumers of the community; while at present it is left to the worker and his family or for the community at large to bear this unjust burden.

"The doctrine of the employer's liability cannot be controverted nor its progress checked even by a Supreme Court deci-It is part of the higher civilization, and despite all legal technicalities, sooner or later it will prevail in the laws of the nation and of every state."-The North American

UNCLE SAM'S VAST RESOURCES

nired wealth, but in the resource enables us to command the world's co United States stands first in the produc tion of many staple commodities and beats all the rest of the world combined in the

yield of mineral oil, copper and corn.

In an age of electricity, copper is an article of prime and constantly increasing necessity, and the world will have to come to us for most of its supply. It is coming to us, and it will come to us for more of it in 1908 than it got in 1907. In a period n which cotton, as an agent of civilization, is pushing its conquering march round the globe, we are producting threeourths of the world's cotton, and we could readily double our present output

The copper, the cotton, the wheat, the oil, the corn, the meats, and the other staple which we are exporting to Europe these days are creating for us the credits stream of gold beyond the dreams o Those were magnificent tribute jurious annually. Concerning to the United States' command over the world's prizes of fortune which the Im perial Bank of Germany and the Bank England paid us when they ad ance their rates of discount two or three times recently, with the vain hope of checking the current of gold which was flowing t

> Congress is likely to give it to us. Amon the men who are in charge of our grea financial interests we need a greater vigi lance, and a more scrupulous regard fo law. We need among the people a bal-ance and a sanity which will save them from foolish stampedes like that precipi tated by the recent scare. Basically out industrial and financial system is stronge that of any other country on the globe The craker and the calamity prophet hav things in the United States to-day.
